

"For Everyone"

Animated and simplified, the treatment process consists of:

- | | | |
|-------------------------|------------------------------------|---------------------------------|
| 1 A screen | 4 A filter | 7 Chlorine injection |
| 2 Grit removal | 5 Pollutant-eating bacteria | 8 Sludge-eating bacteria |
| 3 Sludge removal | 6 Excess bacteria removal | 9 Sludge drying. |

The product is wastewater clean enough for irrigation **10** and marine life **11**.
