**Emergency Sewer Line Work In Progress in the Rollingwood Neighborhood,
City of San Pablo**

(RICHMOND, CA) At approximately 10:30 a.m. on Tuesday, July 25, 2023, a West County Wastewater (WCW) crew discovered a PG&E pole, which had penetrated and damaged a nearby sewer line in the Rollingwood neighborhood of San Pablo. The line is scheduled to be repaired, and currently prevention measures are being taken to avoid a sewer overflow, which include crews pumping sewage from one access hole to another.

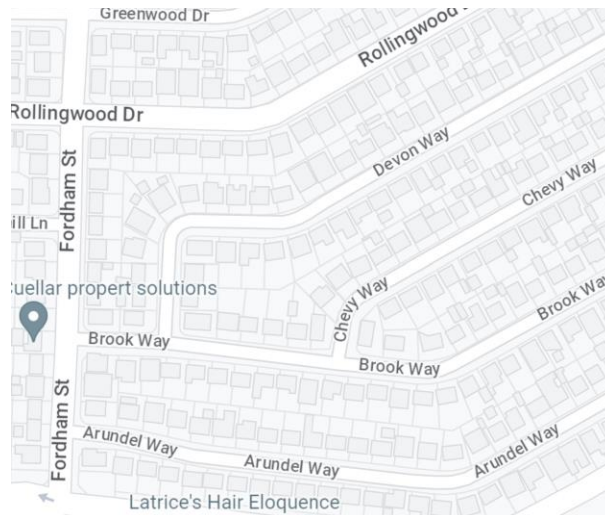

The work will require trucks and other equipment to park and stage on Devon Way and Brook Way in the Rollingwood neighborhood of San Pablo.

WCW thanks the community for their patience while Devon Way, Brook Way, and Fordham Street experience truck traffic and noise until the repair is made.

WCW is anticipating the completion of the repair by no later than Friday, July 28, 2023.

If you're experiencing sewer problems, please call (510) 222-6700.

WCW will continue to provide updates on the progress of the repairs.
